Assignment on Wireframing & Prototyping

Name: Guru Prasath Ragavendran

Email ID: rguruprasath@gmail.com

UpGrad

Problem statement: In the previous session, you developed a sketch for DoToday, a startup working on a next-gen to-do list and task management app. Suppose the app, based on those sketches, was launched and received a huge response from users. But the feedback was also received that a web version of the app is needed. As the PM, you have decided to develop the web version based on the current mobile version. So you need to develop wireframes for the layout of your web app. Once you have your wireframe, you also need to develop a prototype by adding interactivity to your wireframe.

Objectives:

1. Listing down functional requirements for all use cases and choose the best solution
2. Create the required wireframes and place the screenshot of each screen on relevant slides
3. Prepare a slide showing the navigational flow for your wireframes
4. Create the prototype
Feel free to add more slides as needed.

UpGrad

Create desktop version of the app
Login options via cloud account open auth api and New User signup option
Landing page should be summary
Click on + to add task by schedule, image, video or documents
Click on add new list to create new list
Search for the tasks
Click on upcoming or completed view to see the respective tasks
Click on settings to manage user settings
Logout

Used marvelapp for both Wireframe and Prototype — https://marvelapp.com/2142ae66

Dashboard Page

Complete Overview of all tasks

1) Click + to add a new task
2) Edit a particular task using the edit icons next to it
3) Mark a particular task as complete or undo
4) Click on Sync button to sync the current data with your cloud account
5) Search the list of tasks by title or content
6) All actions are performed inside a single page - SPA
7) Add document such as pdf and pin to remind with a date to read
